

## A Description of the Baby Signs® Program and What We Offer

### Introduction

The Baby Signs® Program teaches babies to use simple, easy-to-do gestures for communicating with their parents/grandparents/caregivers to aid the parent-infant communication process. By teaching your baby to sign, you allow them to share their needs, thoughts, feelings and memories before they even have the words for them.

Teaching a baby to sign is easy. In fact, it's as easy as teaching a baby to wave "Bye-Bye!" The Baby Signs® Program can help you and your baby use lots of other gestures to communicate.

### Research & Benefits

The Original Baby Signs® Program is based on the groundbreaking Baby Signs® Research which began an international movement to teach hearing babies to use signs. Through two decades of research, Baby Signs® Researchers have proved that using the Baby Signs® Program: -

- Reduces tears, tantrums, & frustration
- Allows babies to share their world
- Strengthens the parent-child bond
- Boosts babies' self-esteem and self-confidence
- Makes learning to talk easier
- Stimulates intellectual development
